

Contraindications & Precautions to Routine Childhood Immunizations by Condition (1/00)

DTP/ DTaP	Hepatitis B	Hib	IPV	MMR	OPV	Pneumococcal conjugate	Varicella
THIS CONDITION:		CONTRAINDICATES THIS VACCINE:			THIS CONDITION:		IS A PRECAUTION FOR THIS VACCINE:
Anaphylactic reaction to prior vaccine dose any vaccine component baker's yeast gelatin neomycin polymyxin B streptomycin (At the time of this printing the additive list for pneumococcal conjugate was not available.)		that vaccine that vaccine Hepatitis B MMR, Varicella MMR, Varicella, IPV IPV IPV			Moderate or severe acute illness Recent administration of an antibody-containing blood product ³ Neurologic disorder – unstable or evolving Pregnancy (recipient) TB - untreated, active		All vaccines MMR, Varicella DTP, DTaP OPV, IPV ⁴ Varicella ⁵
Encephalopathy within 7 days of previous dose of DTP/DTaP		DTP/DTaP			Thrombocytopenia/ thrombocytopenic purpura (now or by hx)		MMR
Immunodeficiency due to any cause including HIV ¹ : in recipient in household contact		OPV, Varicella ² , MMR OPV			Any of these conditions after previous dose of DTP/DTaP: • Fever of $\geq 40.5^{\circ}$ C (105° F) unexplained by another cause • Collapse or shocklike state • Persistent, inconsolable crying lasting ≥ 3 hours • Seizure or convulsion • Guillain-Barré syndrome		DTP/DTaP within 48 hrs of previous dose within 48 hrs of previous dose within 48 hrs of previous dose within 72 hrs of previous dose within 6 wks of previous dose
Pregnancy (recipient)		MMR, Varicella					

¹ *Symptomatic* HIV infection (AIDS) is a contraindication to MMR and varicella vaccine. *Asymptomatic* HIV infection is not a contraindication to either vaccine.

² Pure humoral immune deficiencies are not a contraindication to varicella vaccine.

³ See ACIP General Recommendations Table 8 for correct spacing.

⁴ If immediate protection is needed, OPV, not IPV, is recommended.

⁵ Varicella vaccine is not recommended for people with untreated, active TB.
